Introduction

NTF 2023/24: LAST TIME OUT WINNERS (LTOW)...

Welcome to the first FREE **Narrowing The Field (NTF)** Guide for the 2023/24 National Hunt season...

This report looks at **TEN of the best trainers** currently around when it comes to successfully placing their **last time out winning horses**. Under the specific conditions highlighted, these trainers give their Last Time Out Winners the best chance of following up that victory with instant visit back to the winner's enclosure...

This is a fairly straight forward method to follow and there were any number of my own saved angles I could have included in this guide, but the ten I eventually settled on would be (pretty much) ten of the strongest LTOW trainer angles that I personally use to help Narrow The Field when it comes to my own day to day National Hunt plays...

As is always the case with an NTF guide, it is entirely up to yourself how you wish to utilise the information and how you add it to your own punting methods...

You may wish to follow all qualifiers from these angles... you may want to pick and choose a couple that appeal to your own punting style... you may want to go off and source your own similar LTOW angles... the choice, as always, is in your own hands...

Happy Punting

The angles in this guide have been taken from a much larger pool of **Last Time Out Winners (LTOW) Angles** that I have plugged into my various racing databases.

Qualifiers from the angles in this free guide as well as all the other LTOW angles I have stored **will be highlighted on a regular basis to full NTF Members in the Daily NTF Stats Sheets** (the NTF Stats Sheets are only available to members of the full NTF Members Service).

I keep constant checks on all of the angles/systems I have plugged in (I've 100's of angles working away in the background at any given time) and the Last Time Out Winners approach is just one of MANY various methods I use to help me determine my daily plays and punts.

Hopefully you will find a way to add this type of analysis into your own approach and find ways of using this NTF analysis guide to enhance your own punting techniques and, subsequently, your punting profits.

Happy LTOW Punting
