Introduction

NTF 2023/24: WILLIE MULLINS ANGLES...

Welcome to the second FREE **Narrowing The Field (NTF)** Guide for the 2023/24 National Hunt season...

This report looks at **TEN of the best WILLIE MULLINS angles** currently around... or at least ten of the best Willie Mullins angles that *I* personally have plugged into my racing databases...

You don't need me to tell you that Willie Mullins is, by a considerable margin, the best National Hunt trainer currently around, and probably has been for several years. As such his runners are generally over-bet and it's not easy for us punters to find profitable methods to take advantage of his expertise...

But there ARE ways in which we can profit from the huge amount of winners Mullins sends out week upon week throughout the year... and this FREE NTF Guide will prove that to you...

Willie Mullins is an 'obvious' trainer to target when looking to 'back winners'... but as I've said many times in the past, just because it's 'obvious' doesn't mean we should ignore it... far from it in fact... the sheer number of runners and WINNERS that Mullins sends to the track makes him an ideal candidate to dig into when looking to build profitable systems and angles to follow...

Happy Punting

Ben (NTF)

When Paul Townend is riding the stats improve to... 20/31 | 65% S/R | +£25.87 BFLSP - W&P 23/31 | 74% S/R

For some of these angles you won't get many qualifiers in a year and the profits will likely be on the skinny side... but as a group of angles/systems they all add up, and as far as trying to make consistent profits from Willie Mullins go this angle-based approach is, for me, one of the best ways to tackle things...

Qualifiers from the angles in this free guide as well as qualifiers from other free guides I've produced/will be producing **will be highlighted on a regular basis to full NTF Members in the Daily NTF Stats Sheets** (the NTF Stats Sheets are only available to members of the full NTF Members Service)...

I keep constant checks on all of the angles/systems I have plugged in (I've 100's of angles working away in the background at any given time), and the trainer specific approach is just one of MANY various methods I use to help me determine my daily plays and punts...

Hopefully you will find a way to add this type of analysis into your own approach and find ways of using this NTF analysis guide to enhance your own punting techniques and, subsequently, your punting profits...

Happy WILLIE MULLINS Punting
