## Ben's thoughts...

*(I'm going to leave this note here... It's a good reminder of what the stats sheets are about)... Never easy to say what one or two I may fancy 'more' than the others (and sometimes I'll have nothing additional to add), if they are on the Stats Sheet then I clearly think they have a chance/conditions to suit and it's extremely likely I'll be backing most of them in some capacity...*
